SUMMARY

Final-year AI/ML engineering student with hands-on experience across the full machine learning lifecycle — data preprocessing, feature engineering, model selection, hyperparameter tuning, and deployment. Built and deployed end-to-end ML systems. Proficient in Python, Scikit-learn, Pandas, and NumPy, with a strong interest in applying ML to solve real-world, data-driven problems.

PROJECTS

Breast Cancer Prediction System

Tech Stack: Python, Scikit-learn, Pickle, Pandas, Numpy, Streamlit

- Developed an ML-powered healthcare application using Scikit-learn and Streamlit.
- Achieved 96.48% classification accuracy in distinguishing benign from malignant tumors using a Scikit-learn model.
- Deployed the application on Streamlit Cloud for public access.

Surge Pricing Engine

Tech Stack: Python, Scikit-learn, Streamlit, Pandas, OpenWeatherMap API

- Built an ML-powered dynamic pricing engine that predicts real-time price multipliers based on demand, weather, time, and location data.
- Compared 5 regression models using RandomizedSearchCV with cross-validation, achieving R^2 of 0.89 with Gradient Boosting.
- Built and deployed an interactive Streamlit dashboard with live weather API integration and dynamic pricing visualization.

CERTIFICATES

The complete Web Development Bootcamp by
Apna College(Sigma 6.0)

EDUCATION

JNTUH College of Engineering Hyderabad

B.Tech in Computer Science Engineering
(AIML)

2023-2027

SGPA: 8.83 (latest semester)

Narayana Jr College

Intermediate (MPC)

Percentage: 93%

Bharatiya Vidya Bhavans ARR School

CBSE

Percentage: 86%

SKILLS

Programming Languages:

- JavaScript
- Python

Web Development:

- React.js
- Node.js
- Express.js
- MongoDB
- HTML
- CSS

Machine Learning:

- Hyperparameter Tuning
- NLP
- Data Preprocessing
- Scikit-learn
- Pandas
- NumPy

Tools & Platforms:

- Git
- GitHub
- Postman
- VS Code

Core Concepts:

- OOPs
- DBMS
- Operating Systems
- Computer Networks

LANGUAGES

English | Telugu | Hindi
