EDUCATION

Bachelor of Technology in Computer Science and Engineering

Jawaharlal Nehru Technological University, Hyderabad

2023-27

CGPA: 8.32

PERSONAL PROJECTS

RAG Document Q&A System

Developed a high performance RAG system for intelligent document question-answering using hybrid semantic and keyword-based retrieval

- Implemented FAISS and BM25-based hybrid retrieval to improve contextual relevance and answer accuracy.
- Integrated multilingual embedding and reranking models to enhance document understanding and inference capability.
- Built scalable pipelines for processing multi-format documents including pdf,docx,pptx,xlsx,html,and images.
- Optimized system performance using async processing,smart chunking,and persistent caching mechanisms.
- Technology Used: Pyhton, FastAPI, PyTorch, FAISS, Langchain, BGE-M3, Docker, Pydantic

Stealth ZK-KYC –On chain ZK identity Protocol for Algorand

Developed a privacy preserving decentralized identity protocol for secure on-chain KYC verification using Zero-Knowledge Proofs.

- Used Groth16- based zk proof verification for secure identity authentication without exposing sensitive user data.
- Built client side identity processing architecture eliminating centralized storage of personal identifiable information(PII).
- Developed smart contracts for on-chain proof verification and Sybil resistant identity validation using anonymous nullifiers.
- Technology Used: Next.js, TypeScript, Algorand, Circom, SnarkJS, Groth16, TailwindCSS, Algokit.

StegoShield-A secure data hiding system

Built a web based image steganography application for securely hiding secret messages within images using the Least Significant Bit(LSB) algorithm.

- Implemented LSB-based steganography for secure message embedding and extraction in png and bmp image formats.
- Built interactive encoding and decoding workflows with real time image capacity analysis and visualization features.
- Technology Used : Python, Django, Bootstrap 5, Three.js, Pillow(PIL), Javascript

EXPERIENCE

Heal Bharat Services

Web Developer intern

Jan - Feb 2025

Remote - Hyderabad, Telangana, India

- Contributed to the development of a real-time health tips web platform with focus on responsive and user-friendly design.
- Designed and implemented landing pages optimized for accessibility,performance, and seamless user experience.
- Collaborated with the development team to enhance frontend functionality and improve website responsiveness across devices
- Technology used:HTML,CSS,Javascript,Bootstrap,TailwindCSS

TECHNICAL SKILLS and INTERESTS

Languages: C/C++, Python, Java, TypeScript, Javascript, SQL

Frameworks and Libraries : FastAPI,React,Next.js Pandas, Matplotlib, Numpy, Scipy, PyTorch, Langchain, etc.

Tools and Technologies: VS/Vscode, Git, Github, Linux, Docker,AWS.

Relevant Coursework: Data Structures & Algorithms, Algorithm Design & Analysis, Operating Systems, Object Oriented Programming, Database Management System, Computer Networks, Machine Learning, Computer Vision, Natural Language Processing and Artificial Intelligence.

Soft Skills: Problem Solving, Self-learning, Team Collaboration, Analytical Thinking

Achievements

India Innovates hackathon 2026 finalist

March 2026

Bajaj Finserv hackathon Hacrx 6.0 finalist

August 2025
